

DRAFT
**Minimum Flows and Levels for the
Loxahatchee River and Estuary**

TABLE OF CONTENTS

Executive Summary.....i

Chapter 1 -- Introduction..... 1

Background..... 1

Process and Bases for Establishment of Minimum Flows and Levels 2

 Process Steps and Activities..... 2

 Legal and Policy Bases for Establishment of Minimum Flows and Levels..... 3

 Identify Relevant Water Resource Functions..... 3

 Identify Considerations and Exclusions: Baseline Conditions to Protect Functions 4

 Level of Protection for Water Resource Functions Provided by *Significant Harm*..... 5

 Other Levels of Harm Considered in Florida Statutes 6

 Consumptive Use Permitting Role - Harm Standard 6

 Water Shortage Role - Serious Harm Standard..... 6

MFL Recovery and Prevention Strategy..... 7

Water Reservations 8

 Legal Description 8

 Water Reservation Implementation Policies 8

Document Structure 9

Chapter 2: Description of Priority Water Bodies 10

Introduction..... 10

Description of the Watershed..... 12

 Climate, Rainfall and Seasonal Weather Patterns 12

 Major Drainage Basins 13

 Watershed Components..... 15

 Loxahatchee River and Upstream Watershed 15

 The Loxahatchee Estuary..... 17

 Adjacent Coastal Waters 18

 Hydrologic Alterations of the Watershed..... 19

 Major Aquifer Systems..... 22

 Soils 23

 Surface Water Hydrology 24

 Water Quality..... 27

 Subbasin 1 (Jonathan Dickinson/Hobe Sound)..... 27

 Subbasin 2 (Coastal Areas) 28

 Subbasin 3 (The Estuary) 29

 Subbasin 4 (C-18 Canal Basin and the Corbett Area)..... 29

 Subbasin 5 (Cypress Creek/Pal-Mar)..... 30

Subbasin 6 (The Groves).....	30
Subbasin 7 (Jupiter Farms/Wild and Scenic River)	31
Land Use.....	32
Water Supply	35
Public Water Supply Demands	35
Agricultural Water Supply Demands	36
Natural Systems.....	38
Major Plant Communities	38
Wetlands.....	40
Uplands.....	42
Estuary.....	42
Fauna	43
Navigation and Recreation	45
Water Resource Issues -- Problems Identified.....	46
Surface Water Resources.....	46
Groundwater Resources.....	47
Habitat Management.....	47
Loxahatchee River Watershed Problem Matrix	48
Chapter 3: Methods	50
Valued Ecosystem Component (VEC) Approach.....	50
Literature Review.....	52
Review of Historical Aerial Photography.....	52
Vegetation Survey of the NW Fork	53
Establishment of GPS Coordinates for Local Features and Study Sites.....	54
GPS Coordinates for River Miles.....	54
GPS Coordinates for Vegetation Points/Stations	55
Development of flow/salinity relationships	56
Monitoring Sites and Sampling Protocol.....	56
Statistical Analyses.....	57
dDevelopment of hydrodynamic-salinity model	58
Model Description	58
Model Calibration and Verification.....	59
Chapter 4: Resource Functions And Considerations	60
Water Resource Functions	60
Fish and Wildlife Habitat.	60
Preservation of the River's Wild and Scenic Values.....	61
Drainage and Flood Protection.	62
Water Supply.	62
Recreation.	63
Navigation.	63
Historical and Archeological Values.....	64
Water Quality Improvement.....	64
Resource Protection Issues and Concerns.....	65
Considerations and Exclusions	66

Considerations	66
Natural Systems.....	66
Hydrology.....	67
Water Supply.....	67
Flood Protection	67
Water Quality	68
Navigation and Recreation.....	68
Exclusions:	69
Chapter 5 -- Proposed Mfl Criteria (Results Section)	70
Technical Relationships Considered in Defining Significant Harm.....	70
Sources of Information	70
Technical Relationships Identified In Other Planning Efforts	71
Valued Ecosystem Component (VEC) Approach	72
Literature Review	72
Sources of Information.....	73
Summary of Findings	73
Historical Changes in River Vegetation Communities.....	77
1940 Vegetative Cover.....	77
1995 Vegetative Communities	79
Comparison to Previous Studies	81
Impacts of Hydrological Alterations and Meterological Events on Vegetative Changes.....	81
Summary	82
Field Vegetation Survey Results for the Northwest Fork.....	83
Statistical Relationships Between Flow and Salinity	86
Summary	90
Preliminary Modeling Results	90
Simulation of the Estuary Tidal Cycle	91
River Response Times to Salinity Change.....	92
Influence of Freshwater Inputs on Salinity	93
Model Results.....	93
Summary	96
River Response to Reductions In Flow.....	97
Proposed MFL Criteria for the Northwest Fork	98
Minimum Flow Requirements.....	98
Minimum Duration Requirement	102
Definition of Terms	105
Criteria for Protection of Cypress Habitat within the NW Fork of the Loxahatchee River	104
Technical Relationships Considered for the Southwest Fork and Estuary.....	105
The Southwest Fork	105
Loxahatchee Estuary	108
Summary of Analysis for the Southwest Fork and Estuary	112
Proposed MFL Criteria for the Southwest Fork	113
MFL Research Needs for the Loxahatchee River and Estuary.....	114
Scope and Purpose.....	114
Tributary Flow Monitoring.....	114
Ground Water/Soil Salinity Monitoring.....	114

Watershed Modeling.....	114
River Corridor Vegetation Monitoring.....	115
Estuary Research	115
General Recommendations	115
MFL Recovery and Prevention Plan.....	115
MFL Recovery and Prevention Strategy Implementation Policies	116
Proposed MFL Recovery Plan for the Loxahatchee River and Estuary.....	117
Literature Cited	120
